

RESOLUTION 94-2

WHEREAS, the Poteet-Rossville-Lytle-Somerset-Kyote "Project Safety" Highway Committee has established the need for improvement and widening of FM476 west of Poteet to FM2790 near Somerset, FM2504 from Rossville to State Highway 173 at Kyote, and FM3175 from FM476 to I-35 at Lytle, along with immediate attention to building a highwater bridge over the Atascosa River on FM2504 between Rossville and Anchorage; and

WHEREAS, the same named roadways are needed for safe passage of school buses, ambulances, fire trucks, and other emergency equipment; and

WHEREAS, the 40-year old roadways cannot handle the burgeoning population in the stated area; and

WHEREAS, the improved roadways would support linkage of the communities in northern Atascosa County to I-35 and its important roll in the development of the North American Free Trade Agreement,

NOW, THEREFORE, BE IT RESOLVED, that the City of Somerset endorses the efforts of the above named group and supports their desire for better roadways.
